MOHIT SEHRAWAT

Gurugram, Haryana | m29247396@gmail.com | github.com/mohit-sehrawat1708

CAREER OBJECTIVE

Motivated B.Tech CSE (AI) student at Gurugram University with hands-on experience building AI-powered tools, leading data initiatives, and competing in national-level hackathons. Passionate about solving real-world problems through machine learning, automation, and full-stack development. Actively seeking an internship or entry-level role where I can apply my technical skills, contribute meaningfully to product development, and grow alongside a forward-thinking team.

EDUCATION

B.Tech — Computer Science & Engineering (AI) — *Gurugram University* Expected 2027

Class XII — Science (PCM + CS) — *Prince Academy of Higher Education, CBSE* 2022 | 84%

Class X — *Prince Academy of Higher Education, CBSE* 2020 | 79%

TECHNICAL SKILLS

Languages: Python, C++, Swift

Web Technologies: HTML, CSS, JavaScript, Next.js 15, TypeScript, Tailwind CSS

Databases & Version Control: SQL, MySQL, Git, GitHub

Tools & IDEs: Android Studio, VS Code, Postman, Framer Motion, Radix UI

AI / ML: TensorFlow, Google Gemini API, OpenCLIP, GLM, scikit-learn

Other: MS Office, Excel, Pandas, BeautifulSoup, Selenium

Soft Skills: Communication, Attention to Detail, Team Leadership, Problem Solving

EXPERIENCE

Head of Data Collection | Training *& Placement Office, Gurugram University* Mar 2026 – Present

- Led a cross-functional team of 4–5 members to scrape, clean, and maintain a structured database of 300+ company profiles and recruiter records using BeautifulSoup, Selenium, and Pandas.
- Built automated data pipelines that reduced manual data-entry time by ~40%, directly supporting placement drive coordination and faculty–industry outreach.
- Designed a standardised data schema for recruiter records, improving data retrieval speed and ensuring consistency across placement cycles.
- Collaborated with the TPO faculty to present weekly reports on data health, recruiter engagement, and upcoming drive readiness.

Junior Tester (Internship) | *Rational Go* Jun 2025 – Sep 2025

- Conducted systematic pre-launch testing across web and mobile platforms to identify functional bugs, UI/UX inconsistencies, and edge-case failures.
- Documented detailed test cases and defect reports, helping the dev team reduce post-launch critical issues and improving overall release quality.
- Collaborated with designers and developers during sprint reviews to validate bug fixes and verify feature rollouts met acceptance criteria.

PROJECTS

AI-Attendance • Python, JavaScript | github.com/mohit-sehrawat1708/AI-Attendance

- Device-installable AI tool that parses uploaded timetable files to extract class schedules, enabling students to mark sessions as Attended, Absent, or Cancelled with a single tap.
- Leveraged AI-based document parsing to eliminate manual timetable entry, making the tool adaptable to varied file formats across departments.

Readme-Architect-AI • Next.js 15, TypeScript, Tailwind CSS, Google Gemini API, Python | github.com/mohit-sehrawat1708/Readme-Architect-AI

- Full-stack AI application that auto-generates professional, structured README files from any GitHub repository URL, with live markdown preview and one-click copy/download.
- Integrated Google Gemini API through Next.js API routes and Python serverless functions; built a polished UI with Framer Motion animations and Radix UI components.

ACHIEVEMENTS & EXTRACURRICULARS

- Competed in 5+ national-level hackathons: HackUtsav 1.0, Hacked 3.0 & 4.0 (BML Munjal University), Hackverse (IILM University), and Code for Bharat — consistently building and pitching functional products within 24–36 hour windows.
- Active open-source contributor on GitHub; maintains a consistent LinkedIn presence sharing project write-ups, dev insights, and tech discoveries.
- Served as a peer mentor in the university coding club, helping junior students with Python fundamentals and guiding them on their first open-source contributions.
